

SKYE BISHOP

EXPERIENCE

Senior Software Engineer

Tinuiti

Mar 2024 - Present

- Built Customer Insights dashboard, delivering interactive, animated charts and a custom CSA map to showcase client demographic data
- Spearheading Forecasting feature to simulate potential outcomes, with configurable visualizations and form for submitting new requests
- Built scalable Segmentation Labeling tool for categorizing data, optimized for performance with datasets exceeding 50k rows
- Developed Offline Inputs for manual data entry, featuring spreadsheet-style paste support and smart autofill to streamline user workflows

Software Engineer II

Glowforge

Apr 2023 - Feb 2024

- Implemented React onboarding flow for first-time users, which resulted in an 80% increase in premium subscription activation
- Enhanced SVG encoding process to allow user created designs to connect rendered paths with internal plugins for text generation
- Led project for migrating to latest versions of React, React Router, and Material UI, with focus on minimizing disruption to other developers
- Stood up Cypress integration testing framework, providing documented guidance to other developers on its utilization

Software Engineer I

Toast

Jan 2020 - Mar 2023

- Drove frontend implementation for new bill splitting feature, allowing a group of diners to split by item or by percentage with live updates
- Organized project for improved UX during various outage scenarios
- Made continual contributions to shared Storybook components
- Collaborated cross-team as part of COVID-19 expedited response, implementing contactless delivery and curbside pickup
- Created internal tool for configuring Toast Drop Points

Software Engineer Co-op

Chewy

Jan - Jun 2019

EDUCATION

Northeastern University

B.S. Computer Science / Media Arts (Animation), cum laude
